

FETAL MONITOR

BFM-10

The world's smallest and lightest (2kg)

- User-defined alarm setting
- Cost saving standard roll paper (110mm)
- Printout (FHR, UA and FM) is fully annotated with record mode, paper speed, date and time
- Single or twins (option) fetal monitoring
- Applicable in hospitals and patient's home
- One-unit fetal monitor and fetal doppler in use from 10th week of pregnancy
